REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: The prior art does not provide for, nor suggests providing for having a value which represents a total usage by at least two processes, each with an adjustable maximum resource usage value, and the total usage value modeled as a leaky bucket, decreasing x units per second. The process requests more usage of the resource, and, providing the current usage level, which represents the total amount of resource in use for all processes, is above the maximum for that particular process. This system is beneficial to be used in industrial process control, weapons control, network interfaces, and the distribution of power between tasks. If the current usage value would exceed a maximum value for the requested process, the system will notify the requestor when the request can be granted. It will also send a message to a network address to notify the requesting process that additional use of the resource is allowed. The process can also use a different process if the task must be executed immediately. The resource in question can be disk access, system time, or memory. The maximum level can also be overridden in order to allow a process, which has already met its maximum, to be allowed additional access to resources. For these reasons, in conjunction with the other limitations of the independent claims, put this case in condition for allowance.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
